SUMMARY

Flutter Developer with hands-on experience building production-grade mobile applications using Clean Architecture and BLoC/Cubit state management. Experienced across the full app lifecycle — from Supabase backend design to Play Store deployment — with additional work in blockchain integration (Solidity, web3dart) and agentic software engineering workflows. SCE-certified engineer.

PROFESSIONAL EXPERIENCE

- Provio Phantom Code, Front end - Flutter developer - On site** 07/2026 – Present | Aleppo, Syria
- Collaborated with a cross-functional team to develop mobile applications, owning the Front-End (Flutter Developer) role
 - Worked within an Agile/Scrum methodology, participating in daily meetings and using Jira for task tracking and Bitbucket for version control
 - Contributed to team discussions shaping UI/UX improvements, translating ideas into polished, user-facing screens
 - Developed clean, maintainable Flutter screens and integrated them with a Spring Boot backend
- Borooa, Computer Engineer - Remote** 03/2026 – 07/2026 | Remote
- Developed the dashboard for Borooa, a marketplace platform dedicated to artisans/craftsmen, while overseeing the website and directing bug fixes and ongoing improvements
 - Built the full dashboard, testing, and continuous improvements
 - Trained a trainer in website development, extending technical knowledge within the team
- Subh, Computer engineer - Hybrid** 11/2025 – 01/2026 | Makkah
- Enhanced platform features and resolved bugs across the website, improving stability and user experience
 - Integrated AI-driven debugging tools, improving code review efficiency
 - Contributed to digital marketing strategies to help promote the platform
- SCRAMBLEBIT, Front-End (Flutter Developer) Internship - Remote** 07/2024 – 08/2025 | Istanbul, Turkey
- Developed and designed 5 mobile app interfaces using Flutter, enhancing user engagement.
 - Contributed to building core functionalities with Dart and state management, ensuring robust performance.
 - Collaborated with engineers to improve UI/UX and optimize app performance, fostering a user-centric approach.

SKILLS

Languages & Frameworks — Dart, Flutter, java, C#

Architecture & State Management — Clean Architecture, MVVM, MVC, BLoC/Cubit, Provider, Dependency Injection (get_it), Structured Error Handling (Either/Result pattern, custom Exception classes)

Backend & Database — Supabase, PostgreSQL, Firebase (Auth, Notifications), Row-Level Security (RLS), Local Caching (Hive, SharedPreferences, SQLite), File/Image Upload (Supabase Storage)

Tools & Platforms — Git, Google Play Console, Postman, Jira, Bitbucket

AI-Assisted Development — Claude Code, MCP (Model Context Protocol), Prompt Engineering, Agentic Software Engineering

Methodologies — Agile/Scrum

Other — web3dart, Blockchain Integration, REST APIs, WebSockets, Real-time Data, Localization, OTP Authentication, Role-Based Access Control, Responsive Design, Performance Optimization, Push Notification Routing, Custom Animations, Pagination, Advanced Form Validation

PROJECTS

- Wakeelek**
- Built the Flutter frontend for Wakeelek, a classifieds app for selling personal items, connected to a Java Spring Boot backend
 - Implemented OTP verification and role-based access control for secure account management
 - Delivered real-time buyer-seller chat, image upload, maps, and pagination for the listings feed
 - Collaborated within a team on a feature-rich app nearing public release
- TreKo**
- Built TreKo, a subscription and expense tracker, independently end-to-end using an agentic software engineering approach, with UI in Flutter (Claude Design) and backend in Supabase (Claude Code + MCP)
 - Designed the Supabase schema before writing any code, treating planning as the most critical project phase
 - Built currency conversion (external exchange-rate API), pagination, custom animations, and multi-step form validation
 - Published on Google Play Store
- Borooa dashboard**
- Built the Flutter frontend for Borooa, a dashboard for a Saudi artisan marketplace, (OTP, notifications, and OTO API for shipping)
 - Cleaned up disorganized backend data with zero disruption to the live store
 - Delivered image upload, pagination, real-time features, and custom-animated form validation
 - Delivered full Arabic/English bilingual support with LTR handling

EDUCATION

Bachelor in Computer Engineer, Gaziosmanpasa University 09/2021 – 06/2025 | Tokat,Turkey

CERTIFICATES

SCE Certification 2026	Claude Code 101 2026	Flutter app development Courses in flutter / 2024-2025	Git & GitHub Course 2025
